Your Leader in FORAGE PROTECTION PRODUCTS

and More!

XP Net Wrap

The XP Net Wrap is the most cost effective netting that we carry.

AVAILABLE SIZES:

48" x 9,840'

48" x 11,800'

51" x 9,840'

51" x 11,800'

64" x 7,000'

64" x 9,000'

67" x 7,000'

67" x 9,000'

Advantages of XP Netwrap:

- End of roll warning stripe
- UV stabilized
- Carry handles

The XP net wrap has been in our lineup for the last 6 years and has made a good name for itself in durability and consistency.

It has rapidly become our largest volume net wrap sold.

Eagle Wrap

AVAILABLE SIZES:

48" x 9,840'

48" x 12,000'

51" x 12,000'

64" x 7,000'

64' x 9,000'

Eagle Wrap® represents a latest evolution of Blue Lake Plastics bale netwrap technologies. Eagle Wrap® is a wide mesh netwrap with 25 reinforced chains. The result is one of the strongest bale netwrap available in the market, with all features of Blue Lake Plastics Bale Netwrap. Eagle Wrap® is designed specifically for Vermeer balers, along with John Deere, New Holland, Case IH and others.

Blue Lake Netwrap

Netwrap

Manufactured in Portugal 100% Virgin Resin Longer rolls equals less handling **High UV Protection Best Value**

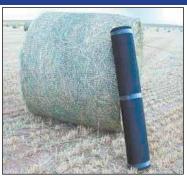

AVAILABLE SIZES:

48" x 13,200' 51" x 12,100' 64" x 9,700'

DuraWRAP™

Black Net Wrap completely binds bales from end to end, keeping them densely wrapped and more weather resistant for higher-quality hay.

- Strongest net wrap on the market
- Provides superior coverage because is keeps its shape and doesn't get narrower as it stretches.
- Resists punctures and tears for safe and reliable transport
- Tight wrap means water is quickly shed off the bale
- Springs off the bale for hassle-free feeding, especially during winter months

MADE IN USA

Gold Line XL

GOLD LINE XL

Advantages of the **Gold Line XL Netwrap:**

- 40% More Feet Per Roll
- Easy Lifter Carry Handles
- Longer rolls means less down time
- Longer Lighter Stronger

AVAILABLE SIZES:

64" x 9000'

AVAILABLE SIZES: 48" x 5,000' • 64" x 5,000'

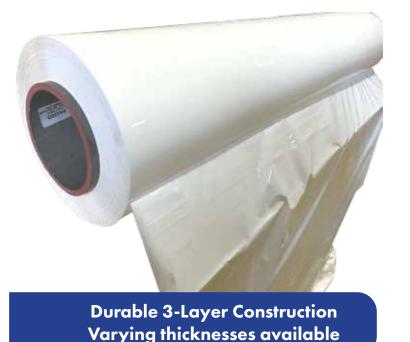

3X SILAGE FILM

Blue Lake Plastics

has been in the plastics distribution
business for over 13 years. In that time,
we have made great relationships with
the top manufacturers in the world.
Quality is Blue Lake Plastics' top priority,
we are a leader in a very competitive
market and will work hard to earn our
customer's confidence in our products.

1 mil = 20" x 6000' per roll 1 mil = 30" x 5000' per roll 1.2 mil = 30" x 4100' per roll 1.5 mil = 30" x 3250' per roll 24 rolls per pallet

3X Super Wrap is a 3 layer blown poly developed for an ever demanding industry. It has very high tear resistance and puncture resistance. It is backed with a 12 month warranty. 3X Super Wrap is available in various sizes and thicknesses to meet our customers needs.

5X SILAGE FILM

FEATURES:

- 5 layer film.
- UV stabilized.

 High elongation at break that minimizes breaking and tearing during the pre-stretch process.

· High puncture resistance to withstand piercing dry stalks and angular corners of square bales.

- Excellent adhesive strength due to unique glue coating method.
- Excellent air exclusion
- Plastics cores.
- Good opacity and color density offer best protection from sunlight.
- Uniform rolls.
- 5X stretch film is a co-extruded multi-layer film, which is manufactured with special latest-generation polyethylene co-polymers that provide excellent resistance to impacts and to tears. Our unique formulation makes it ideal for

high-performance wrapping of silage fodder square and round bales.

• Our stretch film is manufactured with a special designed extrusion and winding system.

24 Rolls per pallet

Thickness = 1ml

Length = 5000'

Blue Lake Poly Twine

- Only virgin plastic resin used in manufacturing process
- Specifically treated UV inhibitor for protection against light degradation
- State of the art manufacturing equipment
- Higher knot strengths

HAYMAX PLUS Hay Preservative

Controls molds and fungi in high-moisture stored grains and forage hay.

Guaranteed Analysis

Propionic acid Min. 68%
Acetic acid Min. 2%
Citric acid Min. 2%
pH 5.5 to 5.8

Packaging

55 gallon drum (480#) 300 gallon tote (2400#) or full semi load (Bulk)

HAYMAX PLUS

Hay Preservative

FEATURES AND BENEFITS

- Consistent results
- Bale hay at higher moisture for higher feed value
- Mold Control
- 30% higher leaf content
- Bale any time of day
- Bale as high as 30% moisture
- More protein per acre

Silamax Water-Soluble 250T

Ingredients

Dried Enterococcus Faecium fermentation product, dried Lactobacillus
Plantarum fermentation product, dried
Pediococcus Acidilactici fermentation product, beta-Glucan

(encapsulating agent), dried aspergillus Oryzae fermentation extract, dried Baqcillus Subtilis fermentation extract, fungal alpha-Aamylase, and green dye.

Guaranteed Analysis

Minimum total viable Lactic-Acid producing bacteria in colony-forming units (CFU) per g: 250 billion CFU/G (Enterococcus Faecium, Lactobacillus Plantarium, Lactobacillus Acidophilus, Pediococcus Acidilactici)

Cellulase 93,000,000 Units/lb.
Fungal Amylase 93,000,000 Units/lb.
Bacterial Amylase 93,000,000 Units/lb.
Beta-Gluvanase 25,000,000 Units/lb.

Available in 50 Ton and 250 Ton Water Soluble packs
Also available in Granular Form - 50 lb. bags

Net Replacement Film

specifically for balers such as Orkel, Krone, McHale, GOWEIL, John Deere and others that have the Net Replacement Film capabilities.

Net Replacement Film (NRF) is a type of film made from highperformance resin used as an auxiliary product for balers instead of net wrap. It is primarily used for baling crops that are to be ensiled. Net replacement film is less elastic than regular net wrap, which means that the bale is held more tightly. The wrapping process also means there are often more than eight layers of plastic around the bale, making it difficult

for air to penetrate, improving silage quality and storage life.

- 50'4" x .075 x 5906'
- 20 Rolls per pallet
- 100-120 bales per roll
- 100% Recyclable

Seal-Master

Seal-Master is a 7-layer, Hi-Performance wrap. Available in 30" width. Color: White (1 mil thickness)

- Extra-high tear strength and resistance to perforation.
- High air-tightness with secure fermentation in the bale, which is of most importance when wrapping.
- Works on all kinds of wrappers, no matter what temperature.
- Very good adhesion for perfectly sealed layers.
- Smooth film surface prevent from damages due to bales sticking to each other while stored.
- Higher UV-protection than comparable products in the market.
- Special plastic core for trouble-free storage of the rolls as well as operating reliability and easier handling due to rounded edges.

Flavor-Seal

A Superior Quality Silage Film

Flavor-Seal is a high performance silage film that delivers high feed value efficiently and profitably. Consistent quality and performance throughout each roll makes it a first choice bale wrap for many farmers. Flavor-Seal is a quality bale wrap made from the finest ingredients available.

Advantages of using Flavor-Seal

- Consistent Quality
- Excellent Stretch Ability
- Superior Cling
- White Reflective Film Color
- UV Resistant

1 mil = 30" x 5000' per roll

1.2 mil = $30'' \times 4100'$ per roll

1.5 mil = $30'' \times 3300'$ per roll

MAXIMIZES THE VALUE OF YOUR RATION WITH MORE STABLE, HIGH QUALITY AND PALATABLE SILAGES

DRIVE	ENHANCE FEED	IMPROVE FEEDOUT
FERMENTATION	DIGESTIBILITY	STABILITY
+++++	+++++	+++++

MAGNIVA® Titanium combines elite lactic acid bacteria USED FOR with high activity enzymes to drive a fast, hygienic ensiling fermentation and improve feed digestibility. MAGNIVA Titanium also contains Lactobacillus buchneri NCIMB 40788 at high inclusion rate - the only silage inoculant reviewed by the FDA to allow claims for improved aerobic stabilty - for maximum feedout stability and minimum spoilage.

USED FOR

- High-moisture corn (HMC), earlage, snaplage
- Silages to be fed during warmer temperatures
- Crops exposed to challenging field conditions that can lead to yeast and mold growth
- Haylages over 35% dry-matter (DM) and baleages
- Corn silage above 32% DM
- Ensiled crops that will be transported or relocated

STRAIN SM	AIN FEATURES	COLONY FORMING UNITS (CFU)
Pediococcus pentosaceus NCIMB 12455	Provides fast, efficient fermentation to maximize DM and nutrient recovery and inhibit bad fermentations due to clostridia, listeria, enterobacteria, etc.	100,000 CFU/g fresh forage 150,000 CFU/g HMC
Lactobacillus buchneri NCIMB 40788	Reduces heating and spoilage for improved feedout stability, maximizing high quality hygienic feed available.	400,000 CFU/g fresh forage 600,000 CFU/g HMC

OUR GUARANTEE: WHAT IS ON THE LABEL IS INSIDE THE PACKAGE!

MAGNIVA Titanium Available Sizes

182 g pouch of water-soluble concentrate treats 100 tons of fresh forage or 66 tons (approximately 1,953 bushels) of HMC 907 g pouch of water-soluble concentrate treats 500 tons of fresh forage or 333 tons (approximately 9,852 bushels) of HMC

OMRI formulation is available. Contact Blue Lake Plastics...

HITEC manufactures wide 3-layer black/white silage films. The white layer, facing the sky, reflects heat and prevents overheating of the stored product, while the black layer assures total opacity which is necessary for maintaining the quality of the stored product and its nutrient value. Due to their 3-layer structure the films have lower gas-transmission than monolayer films and lead to better fermentation of the stored product, hence in better quality of the animal feed and more milk production.

USER PROVEN - THE STRONGEST BAGS

PROVEN VALUE GREATER CAPACITY

BECAUSE OF OUR UNIQUE RESIN FORMULATION

HiTec manufacturers wide 3-layer black/white silage films. The white layer, facing the sky, reflects heat and prevents overheating of the stored product, while the black layer assures total opacity which is necessary for maintaining the quality of the stored product and its nutrient value. Due to their 3-layer structure the films have lower gas-transmission than monolayer films and lead to better fermentation of the stored product, hence in better quality of the animal feed and more milk production.

HITEC UNDERLAY

UNDERLAY SYSTEM - HOW IT WORKS

- During fermentation oxygen is consumed creating a "mini-vacuum" that pulls the flexible Underlay® tightly against the feed surface eliminating air pockets.
- The silage adheres to the thick Underlay® sheet rather than the thick top layer sheet, increasing

recycle value of the thick top layer sheet.

- Underlay® is a 2nd fire wall in case of damage to the top layer.
- Proven System in use for 30+ years in Germany & other parts of Europe.

2-In-1 Combo Option

- 5 mil Silage Sheeting & 1.6 mil Underlay® in a single roll
- Unroll and Unfold both films in one fast and easy operation
 - 5 mil holds down the 1.6 Underlay® during installation

FOR BEST RESULTS:

Pack silage well, cover as soon as possible, overlap 5' if possible and pack feed with minimum of 50% moisture.

SuperProtect®

UNMATCHED STRENGTH TO REPLACE SCRIM REINFORCED FILMS

Introducing SuperProtect®. Designed to provide superior crop protection and replace scrim reinforced products. SuperProtect® offers a lighter, more flexible, recyclable, and stronger solution. Developed with advanced materials, this 7-layer PE film resists punctures and tears for applications requiring high performance. Also available in EVOH Absolute Oxygen Barrier versions.

UNBREAKABLE PERFORMANCE

Exceptional tear & puncture resistance to help you safeguard your crop during or after film installation.

EFFORTLESS INSTALLATION

SuperProtect® is **lightweight and flexible**, making installation quick, easy and safe.

RECYCLABLE

SuperProtect® is the only **recyclable** solution in the market that can exceed the strength of scrim reinforced films.

ULTRA-WIDE WIDTHS

Save time and costs from installations by benefiting from widths up to 150ft!

APPLICATIONS

- Silage covers
- Grain pile covers
- Hay covers

- Lumber covers
- Insulation liners
- Construction sites
- Building enclosures
- Erosion control

SILO₂BLOCK®

A REAL OXYGEN BARRIER SILAGE FILM

SilO2Block® is a very strong and flexible **7-layer barrier**, that includes a thin EVOH layer in the middle. Having 50 times lower O2 permeability than PE, SILO2BLOCK prevents the entry of O2 in the silo, thus improving the conditions of anaerobic fermentation and resulting in less spoilage and higher quality of the stored product.

50 times lower 0₂ permeability than conventional silage films

Thinner, still stronger than a standard 6 mil (150 mic.) PE film

Easier to handle and install Safely packed with PE film + non-woven cover for additional protection **Soft & flexible,** it
fits better on
the silo and
creates less
air pockets

Available at very **large widths**, up to 130'

Possible folding x16 for easier transportation & storage

- 12 year warranty on UV degradation.
- Stainless Steel Grommets allows easy securing of cover.
- Double stitched hem around the perimeter.
- Unmatched quality will ensure many years of use.
- Endless list of uses, Windbreak, Sunscreen, Silage Bag Cover.
- Fortress Covers fold easily making storage convenient.
- Professional fit and finished product.
- Ships easily.
